- tienchung.online
- Hanoi City

Skills

PROGRAMMING LANGUAGES

- Java (Core, OOP)
- Python, C/C++
- SQL
- HTML, CSS, JavaScript

BACKEND & FRAMEWORKS

- Spring Boot (Security, JPA)
- RESTful APIs
- MySQL, SQLite
- Maven, Gradle

SYSTEMS & DEVOPS

- Linux (Ubuntu Server)
- Git & GitHub
- Docker
- CI/CD (GitHub Actions)

Objective

Fourth-year Information Technology student with practical experience in Java backend development (Spring Boot) and Linux environments (Docker, CI/CD). Passionate about writing clean, maintainable code and eager to contribute to production projects as a Java/Backend Developer Intern, with a long-term focus on building scalable and high-performance systems.

Education

Information Technology 2023 - Present

Thang Long University

GPA: 3.2/4.0

Projects

Tech Leader / Backend Developer Mar 2026 - May 2026

Pharmacy Management API (Java Spring Boot)

• Architected a RESTful API following layered architecture for medicine inventory, sales, and order management.
• Secured endpoints using Spring Security and JWT; implemented Role-Based Access Control (RBAC) and data validation.
• Configured automated CI/CD pipelines with GitHub Actions to build and deploy Docker containers to a Linux VPS.
Tech Stack: Java 17, Spring Boot 3, Spring Security, JWT, Spring Data JPA, MySQL 8, Docker, CI/CD.
GitHub: ChungPr0/pharmacy-management-api

Team Leader / Backend Developer Dec 2025 - Jan 2026

Point of Sale System (Java Swing)

• Developed a desktop POS management system applying MVC architecture for retail sales and automated invoice generation.
• Integrated an embedded SQLite database using JDBC, ensuring transaction integrity (ACID) during checkout operations.
• Designed role-based privilege controls (Admin/Cashier) and reporting modules for real-time inventory tracking.
Tech Stack: Java 17, Java Swing, SQLite, JDBC.
GitHub: ChungPr0/retail-pos-system

Independent Developer Apr 2026 - Present

Multi-functional Discord Bot (Java)

• Developed an event-driven automation bot utilizing JDA (Java Discord API) via WebSocket connections.
• Handled asynchronous tasks for automated moderation, text/voice channel management, and custom interactions.
• Packaged dependencies with Maven and automated continuous 24/7 deployment on an Ubuntu Linux server using Docker.
Tech Stack: Java 17, JDA, Maven, Docker, CI/CD, Linux.
GitHub: ChungPr0/discord-manager-bot
